

Effective Green Roof Plant Specifications

In order to price and plant projects according to your design intent, please provide specific information on plant species selections, planting densities and patterns or other special instructions. Your local LiveRoof representative can help you to select the plants that best complement the architecture and suit the microclimate of your project.

Below is an example of a well written green roof plant specification, with graphics to illustrate.

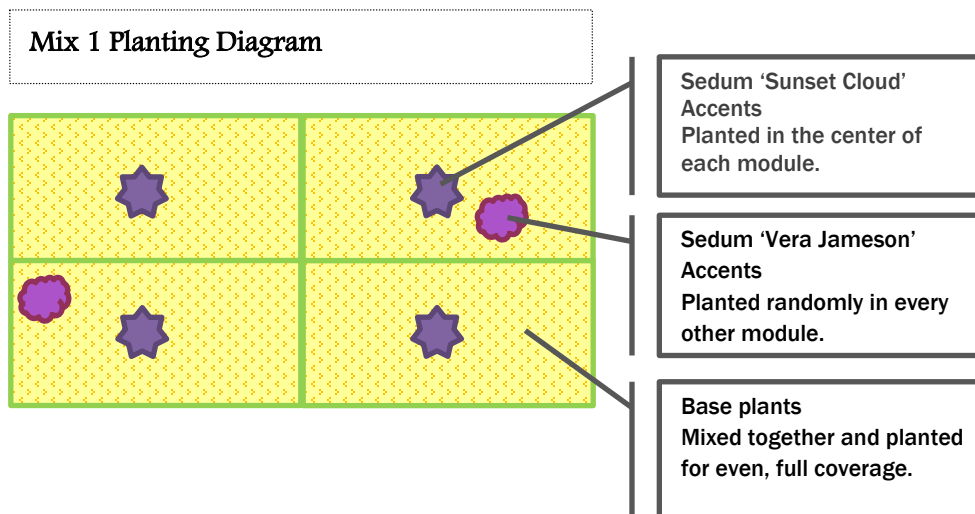

Mix 1: Carefree Yellow and Purple Mix

Base Plants:

- Sedum acre ‘Aureum’
- Sedum album ‘Chloroticum’
- Sedum reflexum Sunsplash
- Sedum reflexum Moonshine

Accent Plants

- Sedum caudicola ‘Sunset Cloud’
1 per module, planted in the center of each
- Sedum x ‘Vera Jameson’
½ per module, planted randomly to look natural

Mix 2: Carefree Giants Mix

Base Plants:

- Sedum aizoon ‘Euphorbiodes’
- Sedum hybridum ‘Immergrunchen’
- Sedum spurium ‘Green Mantle’
- Sedum spurium ‘Pink Jewel’
- Sedum takesimense

Accent Plants

- Allium schoenoprasum var. sibiricum ‘Pink Giant’ 1 per module alternate left and right sides with one of the following accents
- Sedum kamschaticum ‘Takahira Dake’ ½ per module
- Sedum spectabile ‘Neon’ ½ per module
